This text is the fruit of extensive research into the Chinese medical literature on pediatrics and the response to years of practitioner requests for a good, comprehensive TCM pediatric textbook. It covers over 45 common pediatric complaints, giving differential diagnosis, disease mechanisms, herbal treatment, acupuncta therapy where appropriate, and Bob's comments about each one. These diseases are presented in the chronological order that they usually appear & include everything from colic and cradle cap to mumps and pediatric hyperactivity. There are also special sections on pediatric diagnosis and treating young children with Chinese herbal medicines, immunizations, and dietary therapy.

I'm very pleased with this book

By alwaysastudent

I'm very pleased with this book. As one who has purchased multiple books by Bob Flaws, I have yet to be disappointed in his work. I highly recommend this book if one is considering working with a pediatric population.

Not great but perhaps the best on the market

By Ludmila

Bob Flaws did a good job here, but a problem is that he does not help with dosage/grams used in the formulas he writes about in his book. But otherwise it is a good reference book and has a lot of important and interesting information on pediatrics in TCM, both for lay people and professionals. I would supplement this book with Julian Scott's and Teresa Barlow's Acupuncture in the Treatment of Children (3rd Edition) which is really great and much more detailed than the Handbook. However, as the title says, there is not much info on herbal formulas and other treatment, so these two books together should perhaps be on a bookshelf of every TCM therapist specialising in pediatrics.
