ANCIENT ALIENS IN AUSTRALIA: PLEIADIAN ORIGINS OF HUMANITY BY BRUCE FENTON, DANIELLA CARDENAS, STEVEN STRONG, EVAN STRONG PDF

Did extra-terrestrials visit Australia in the remote past? Could it be that they genetically enhanced the resident human population? Are there sacred sites dotted around Australia that date back to this ancient contact event? What are the wise elders of the Original Australian population saying about their understanding of human origins and 'Sky Heroes'? Ancient Aliens In Australia provides an astonishing examination of these questions and also gives us: Scientific data that proves Australia was the first land to host modern humans, not Africa | Interpretations of ancient engravings telling a story of an ET contact event in the remote past | Re-examination of Dreamtime stories | Details of a modern Australian shaman journeying to meet with the Ancient Alien Sky Heroes themselves | Discussion of a number of relevant psychic and supernatural events | Incredible details of the ET races that have interacted with Earth, such as Pleiadians, Greys and Reptilians...and their agendas. After examining the archaeological, mythological and metaphysical evidence, the authors demonstrate that there is now good reason to accept the Original Australian people's account of human origins, one that states their culture has interacted with extra-terrestrial beings. Be prepared to rethink all you thought about your ancient ancestors and their level of understanding regarding the cosmos. Your view of human origins and our cultures place in the universe will be forever changed!

Requires an open mind and willingness to learn new things

By brewstout

This is a great book and I highly recommend it. Having said that it will expand your horizons to where you may not have thought "acceptable". Never mind that, it's been a steep climb for humans since discovering the world was round... again..... It was obviously known before - as is this. I highly respect that the Strong's are in communication with and directed by the Original Australian Elders. So much as been kept 'under wraps' by the indigenous elders of the world until the time was right. It is that time now - and a critical time for us all at that. We have the memory in our very DNA and cells.... but we have to remember how to access that info. Some people - and a lot more are speaking up now - have accessed that by remembrance, regression, etc. The tribal people of many places (including North America) have not forgotten their ancestry from the stars. The second part of the book may be a stretch for some that it is new information for them.... not for a lot of people though. If you cannot accept that your academic history may not have told the whole truth, this may not be for you - yet. For those willing to listen to learned elders and real evidence, then you will be fascinated - and educated.

Well written, but the second half of the book isn't very good

By P. Longworth

I didn't mind the first part of the book, but the lack of scientific information especially in the second part, with a clairvoyant expressing his past life as an alien in a damaged spacecraft, some 250,000 years ago, was taking things too far. If he could back this up with scientific proof - yes, clairvoyants / mediums can be tested, then maybe I would have bought this book. Overall, the book was well written, and while the first half isn't too bad, I thought it could have been much better. The second author reflects the book's lower rating. There were many times when I wanted to throw it away and give up, but I did continue till the end. I didn't find the book very satisfying as a result of the second author. I didn't buy his account. I wanted to see more backup information.

... unreal but when one seeks the truth it is easy to understand

By GURDA PIERCE

Firstly it all seems all so unreal but when one seeks the truth it is easy to understand. I would, and am suggesting to everyone I can to read this book. Excellent and thank you to the authors for taking the time to share this critical knowledge with humanity. May it be that we are set free from the slavery that has kept us imprisoned for so long.
