Exactly what I needed

By Elizabeth LePage

It's exactly what I needed although there is one mistake on one of the geologic time lab reports. Other than that, there's a whole table of measurements on the inside cover and various topographic map labs.

When the book arrived, it did not say "LAB" ...

By L. Crawford

When the book arrived, it did not say "LAB" on the front as in the image. It caused some confusion and duplicate purchases. Now you know :)
