Radiology Illustrated

By Joseph J Grenier

Diagnostic and Interventional Radiology

Springer Berlin Heidelberg

Re: Joseph Grenier MD PhD

This is outstanding combination atlas and textbook on the Field of Diagnostic and International Radiology. Central nervous system, pulmonary, hepatic, splenic, cardiac, inflammatory, degenerative, hematopoietic, and malignant diseases are defined in terms radiographic, CT, US, MRI, SPECT, and other modalities.

The differential diagnosis, classification, and staging of diseases are included in sections of an organ system viewpoint. This is a good book for students, Radioiology residents, and practicing radiologists. It is over 1000 pages with numerous illustrations in terms of hundreds.
