We are currently witnessing the global diffusion of multiculturalism, both as a political discourse and as a set of international legal norms. States today are under increasing international scrutiny regarding their treatment of ethnocultural groups, and are expected to meet evolving international standards regarding the rights of indigenous peoples, national minorities, and immigrants. This phenomenon represents a veritable revolution in international relations, yet has received little public or scholarly attention.

In this book, Kymlicka examines the factors underlying this change, and the challenges it raises. Against those critics who argue that multiculturalism is a threat to universal human rights, Kymlicka shows that the sort of multiculturalism that is being globalized is inspired and constrained by the human rights revolution, and embedded in a framework of liberal-democratic values.

However, the formulation and implementation of these international norms has generated a number of dilemmas. The policies adopted by international organizations to deal with ethnic diversity are driven by conflicting impulses. Pessimism about the destabilizing consequences of ethnic politics alternates with optimism about the prospects for a peaceful and democratic form of multicultural politics. The result is often an unstable mix of paralyzing fear and naïve hope, rooted in conflicting imperatives of security and justice. Moreover, given the enormous differences in the characteristics of minorities (eg., their size, territorial concentration, cultural markers, historic relationship to the state), it is difficult to formulate standards that apply to all groups. Yet attempts to formulate more targeted norms that apply only to specific categories of minorities (eg., indigenous peoples or national minorities) have proven controversial and unstable.

Kymlicka examines these dilemmas as they have played out in both the theory and practice of international minority rights protection, including recent developments regarding the rights of national minorities in Europe, the rights of indigenous peoples in the Americas, as well as emerging debates on multiculturalism in Asia and Africa.

Winner of the North American Society of Social Philosophy Book Prize.

The Theory of "liberal multiculturalism"

By Lee Cheek

In assessing the expanding international attention devoted to the protection of ethnic and cultural minorities, Kymlicka (Queen's Univ., Canada) has become one of the major advocates of a liberal multiculturalism as the guiding principle of such pursuits. This book serves as an extension of his earlier scholarship, as well as an attempt to integrate the political theory of multiculturalism with the insights of empirical political analysis. Liberal multiculturalism, Kymlicka argues, is an outgrowth of the longstanding emphasis upon human rights in international politics, and is not based upon notions of cultural relativism. The major purpose of the book is to analyze "the current process of internationalizing multiculturalism" and the obstacles involved with the implementation of the concept. In the first of three major divisions of the work, Kymlicka explores the success of liberal multiculturalism and the decline of traditional views of the state, sovereignty, and ethnic politics. The second part is a survey of the "logic of liberal multiculturalism" and an exploration of the potential threat that liberal multiculturalism presents to existing understandings of human rights and state sovereignty. Finally, Kymlicka reviews the efforts of international organizations to utilize liberal multiculturalism in practice.
