From the Inside Flap

Contents Foreword Section 1--Primitive Technology Section 2--Fire--Where We Begin Section 3--Bone, Stone & Wood--Basic Elements Section 4--Fibers--Holding The World Together Section 5--Projectiles--Power From The Human Hand Section 6--Art & Music--Discipline and Meaning

From the Back Cover

Living in modern society, we have become increasingly disassociated from the earth, from the essence of ourselves, and the need is awakened in us to return to the wilderness--physically and emotionally. We long to feel a sense of connection with our ancient roots. This urge is what has prompted man's fascination with primitive skills: producing objects from natural materials using methods similar to prehistoric cultures.

Primitive Technology: A Book of Earth Skills is a sharing of ideas--the philosophies, the history, and the personal stories by the authorities on primitive technology from teh pages of The Bulletin of Primitive Technology.

Included are instructions for creating fire and tools of wood, stone, and bone, as well as fiber adhesives, projectiles, art, and music. Practicing these primitive methods will lead the seeker towards a tangible, raw connection with the ancient past, with nature's resources and, ultimately, with the creative forces that constructed the foundation of man's survival on the planet.

About the Author

David Wescott is author of Camping in the Old Style and editor of Primitive Technology: A Book of Earth Skills. Formerly education director for the Boulder Outdoor School, he has been a leading figure in wilderness education for more than thirty years. He lives with his wife in Rexburg, Idaho.

Great Information

By ALEKS

This book is not for beginners but has a real depth of knowledge. Not many step by step instructions, but if you already have a base of bushcraft or primitive skills there are lots of nuggets in here to inspire you. The chapter on making bone blades and tool points was very useful to me. Great atlatl info also. Get into the woods and experiment!

4 of 4 people found the following review helpful.

Curious about primitive technology?

By Randy J. Mercurio

If you are curious about what primitive technology is about this book will give you a good introduction. Lots of cool drawings and pics but don't expect step by step, hand held instructions for the multitude of topics covered in this compilation. If you don't know much about this stuff then some vocabulary may be new to you such as atlatls, celt, haft, biface, pecking and the list goes on. It was new for me but I found that my interests grew deeper and soon found myself buying books on flintknapping (did I have money for that...?) which I knew next to nothing about not too long ago. Inspirational in so many regards with some reasonable instruction from pics and words combined but I think these articles were intended for those with some background in the subject. Many short articles with great tidbits for the outdoorsman. A taste of this and a flavor of that by leading authorities whose expertise is compiled into one book. I recommend it highly not only for the curious but the outdoorsman, survivalist and tinkerer! I love that little knife in the middle foreground on the cover!
